

RN Senior Interview Roadmap

5-YEAR PROFESSIONAL TRACK | JS • TS • REACT NATIVE CLI • AI

00:00 - 00:25: JS / TS Logic Drills 00:25 - 00:50: RN Advanced Coding 00:50 - 01:00: AI Architecture Review

Week 1: Modern JS/TS & State Architecture

DAY	JS & TS (LOGIC FOCUS)	REACT NATIVE (FEATURE)	AI INTEGRATION (CLAUDE/GPT)	
1	JS Closures, Prototypes, & Event Loop.	Refactor Class to Functional (Hooks)	Explain Event Loop via AI analogies	
2	TS Interfaces, Types, & Enums.	Build a Custom Auth Hook	AI: "Convert this JS API response to TS"	
3	JS Async/Await vs Promises.allSettled.	Redux Toolkit (RTK) Slices	Write an async wrapper for RN Fetch	
4	TS Generics & Utility Types (Pick/Omit).	RTK Query & Cache Strategies	Generate generic Table props in TS	
5	JS Array Methods (Reduce, Map, Flat).	Context API + useReducer System	Solve LeetCode 'Easy' using AI as guide	
6	TS Advanced Decorators & Namespaces.	Performance: useMemo/ useCallback	Audit code for unnecessary re-renders	
7	Review	Weekly Logic Challenge	Deep Build: Auth Service in TS	"Critique my TS Architecture"

Week 2: Navigation, Deep Links & Typings

DAY	JS & TS (CODING)	REACT NATIVE (CLI)	AI INTEGRATION	
8	JS Deep vs Shallow Copy (StructuredClone).	Nested Navigator Setup (CLI)	AI: "Implement a Deep Clone in TS"	
9	TS Navigation Prop & Route Typings.	Custom Screen Transitions	Generate StackParamList for 10 screens	
10	JS Currying & Partial Applications.	Manual Deep Link (Android Config)	Analyze AndroidManifest via AI	
11	TS Type Guards & Assertion (is).	Universal Links (iOS Config)	Write a secure Deep Link Validator	

12	JS Memory Management (WeakMap/Set).	Auth Flow Persistence Logic	Ask AI to find a memory leak in a list	"Refactor using SOLID principles"
13	TS Mapped Types & Template Literals.	Global Loading/Toast Manager	Build a typed Toast emitter	
14	Review	Logic: Flatten Nested Objects	Deep Build: Configurable Navbar	

Week 3: Native Modules & Async Patterns

DAY	JS & TS (CODING)	REACT NATIVE (BRIDGE)	AI INTEGRATION	
15	JS Generators & Iterators.	Local Notifications (Typed Props)	AI: "Explain Generators for Redux-Saga"	"Audit Bridge Security"
16	TS Conditional Types (T extends U).	FCM Background Message Handling	Map complex JSON to TS interfaces	
17	JS Module Pattern (CommonJS vs ESM).	Native Module: Android (Java/Kotlin)	AI: "Create Kotlin Bridge Boilerplate"	
18	TS Namespace vs Modules.	Native Module: iOS (Obj-C/Swift)	AI: "Create Swift Bridge Boilerplate"	
19	JS Proxy & Reflect API.	Background Fetch & Headless JS	Build an observable state using Proxy	
20	TS Declaration Files (.d.ts).	JSI & The New Architecture (Bridge-less)	Summarize Fabric/TurboModules with AI	
21	Review	Logic: Custom Promise.all	Deep Build: Battery Status Bridge	

Week 4: Optimization, Security & AI Mastery

DAY	JS & TS (CODING)	REACT NATIVE (SCALING)	AI INTEGRATION	
22	JS Debouncing & Throttling.	FlashList vs FlatList Profiling	AI: "Write a high-perf Search Bar hook"	
23	TS Exhaustive Checks (never type).	Secure Storage (Keychain/Keystore)	Audit AsyncStorage security risks	
24	JS RegExp for Validation logic.	Offline Sync Queue (AsyncQueue)	Build a TS-typed Regex validator	
25	TS Testing Types with TSD.	Unit Testing (Jest/RNTL)	Generate 10 Unit Test edge cases	

26	JS Web Workers (Thread logic).	CI/CD: Fastlane & GitHub Actions	Write a .yaml deploy script with AI	"Interview me as a Senior RN Dev"
27	TS Brand Types (Nominal Typing).	System Design: Real-time Chat App	AI: "Design WhatsApp DB schema"	
28	Review	Logic: Sorting Algorithms	Final: Full Auth Flow TS + AI	

5 years of experience means expectations are high on **Code Quality** and **Architecture**. Never just copy AI code—refactor it for **Type Safety**.
